

Overview

Sierra Monitor’s secure IoT Gateways are fully integrated with the SMC Cloud Platform. The gateways enable OEMs to easily connect new and legacy devices to the cloud. These gateways can connect Serial, Ethernet, LonWorks, KNX, M-Bus and I/O devices to the cloud via wired (Serial and Ethernet) and wireless (Wi-Fi and Cell Modem) installations. When OEMs have any common protocol, the gateway can be used to connect to the SMC Cloud without additional engineering. SMC IoT Gateways support 140+ common protocols. Typical protocols include: Modbus, BACnet, EtherNet/IP, SNMP, LonWorks, KNX and many others. The OEM devices can instantly be cloud enabled to support secure remote device monitoring, control, data collection and alarming.

Benefits of the IoT Gateway Platform

- Simple web interface to easily configure OEM devices using a browser on a PC or mobile device.
- SMC Cloud registration connects OEM devices to the cloud, allowing secure remote access for diagnostics, monitoring, alarming, configuration and access to the SMC device dashboard.
- Multiple OEM devices (in a single location) can be connected through one gateway.
- After installation, the gateway can be registered to the cloud in less than five minutes.
- Secure communication from the gateway to the SMC Cloud Platform is encrypted using the industry standard Transport Layer Security (TLS) v1.2. All web traffic sent to the cloud platform uses HTTPS on port 443 to ensure that data transmission remains encrypted.
- Secure data transfer to 3rd party business applications and analytics cloud packages through SMC’s RESTful API.
- Direct connection API’s are available for third party data clouds including ThingWorx.
- These gateways can also provide protocol translation to popular building management protocols.
- No annual subscription for cloud service. SMC’s IoT Gateways come with free cloud connectivity for 5 years.

SMC’s IoT Gateway Connectivity Options

| Product | Serial Port | Ethernet | Wi-Fi | Cell Modem | O-10V | I/O |
|------------------|-------------|----------|-------|------------|-------|-----|
| ProtoAir FPA-W34 | Yes | Yes | Yes | No | No | No |
| ProtoAir FPA-C34 | Yes | Yes | Yes | Yes | No | No |
| FieldCast | Yes | No | Yes | No | Yes | Yes |
