## **Sierra Monitor Products on Display at AHR 2009 Expo**

January 10, 2009 – Sierra Monitor's will be exhibiting at the AHR 2009 Expo in Chicago, sharing the FieldServer Technology booth.

Gas detection is an important safety tool for maintaining safety in today's energy efficient buildings. It is necessary to monitor for unsafe levels of Carbon Monoxide in addition to leaks from other gases in industrial buildings.

On display at AHR will be the new IT Series network-enabled gas detectors, the most comprehensive gas detectors available, featuring user-friendly digital display, 4-20 mA output, RS-485 Modbus output, integral relays, SentryBus output and extensive self-diagnostics for reliable accurate monitoring. The IT Series meets the user needs in integrated gas monitoring with plant-wide safety monitoring.

The 4501 Series 2-wire gas detectors provide low-cost installation with feature-rich capability including digital display, self-diagnostics and 4-20 mA output.

### **About Sierra Monitor Corporation**

Sierra Monitor Corporation has been a manufacturer of ambient hazardous gas monitoring systems for over 23 years. With over 14,000 installations of fixed gas monitoring systems and access to the world's best gas sensor technologies, Sierra Monitor is a leader in hazardous gas detection systems. Sierra Monitor's Sentry Gas Risk Management System has always been a leader in data handling for hazardous gas monitoring systems for over 15 years. **First** with digital 2-way communication bus from sensors to controller, **first** with serial Modbus communication output for plant-wide systems, **first** with the ability to interface to other sensors and devices and now **first** to offer a cost-effective web-based graphical system for monitoring plant-wide hazardous gas conditions.
