For Immediate Release

Sierra Monitor Products on Display at Outside Plant Expo

August 1, 2007 – Sierra Monitor's will be exhibiting at the OSP Expo in San Jose, California. As a leader in the production of gas and environment monitors for remote sites in the telecommunications industry, Sierra Monitor products can be found in Controlled Environment Vaults, Walk-In Cabinets and Cell Site Buildings across the country. The Model 2400 Vault Monitor has been protecting facilities and personnel for over 20 years. The powerful environment controllers and the new Intelesite cell site monitor are providing operators with up-to-date information as to the performance and safety of remote buildings. The Sentry gas risk management system monitors for hazardous gas conditions in central buildings for the telecommunications industry.

The Model 2450 Environment Controller has been installed in over 90% of all new CEV's deployed since its introduction. The new Intelesite provides operators with the dependable remote site operation information to improve site reliability and reduce operating costs.

About Sierra Monitor Corporation

Sierra Monitor Corporation has been a manufacturer of gas detectors and environment controllers for the telecommunications industry for over 23 years. Sierra Monitor is also a leading manufacturer of hazardous gas detection systems. With over 14,000 installations of fixed gas monitoring systems and access to the world's best gas sensor technologies, Sierra Monitor is a leader in hazardous gas and flame detection systems.
