## **UL Approved Custom Cabinets**

May 10, 2004 -- Sierra Monitor has been certified by TUV Rhineland of North America as an Industrial Control Panel (ICP) manufacturer. The Industrial Control Panel program allows manufacturers who custom build or mass produce ICP's to apply a NRTL listing mark at their factories to panels that comply with the appropriate requirements. As a certified ICP this certification allows SMC to produce and label our control panels as UL 508A compliant panels. UL 508A is designed to protect personnel from fire and shock hazards.

The ICP custom builders program is accepted by local Authorities Having Jurisdiction (AHJ) as a National Recognized Testing Lab (NRTL) approved program. The advantage for SMC customers is that they can receive a custom panel, designed for their specific requirements, provided by the same supplier as their gas detection system. Thus there is no need for multiple suppliers and you receive a approved top quality system.

### **About Sierra Monitor Corporation**

Sierra Monitor Corporation has be a manufacturer of ambient hazardous gas monitoring systems for over 23 years. With over 14,000 installations of fixed gas monitoring systems and access to the world's best gas sensor technologies, Sierra Monitor is a leader in hazardous gas detection systems. Sierra Monitor's Sentry Gas Risk Management System has always been a leader in data handling for hazardous gas monitoring systems for over 15 years.
